

Fixa Construction Chemicals

Corporate Presentation

2020

The value of the buildings are increased with the happiness of people living inside them.

We believe that we can live happily only in buildings constructed with high technology chemicals. We, as Fixa Construction Chemicals, are producing high technology construction chemicals since 2001 for cozy homes and higher quality of life in buildings, in our production facilities in Istanbul (2), in Adana and in Ankara.

Milestones

Our Values

We Are Focused On Quality

We do not content ourselves only with a flawless production. Our mission is to service our clients with an holistic approach.

Quality is always targeted at its highest level, both in production and in our managerial departments.

Our Clients Are Invaluable

Our R&D department continuously works to meet the demand of our customers.

Technical support and standing behind our products are key to our customer relations.

We Are Passionate About Our Work

We are passionate about our work. We owe the remarkable growth we achieved to our passion for our work.

Our employees has a sound contribution to our success.

Our Promises

We Are Where You Are!

We founded our production facilities taking **the strategic locations** into consideration for fast and economical delivery.

Our Quality Approach

The driving force behind our success is our respect to the quality processes.

Flawless production is the main philosophy of our company.

Our Aim For Flawless Production

Each product is tested by our Quality department at each stage of the production until the delivery to the customer.

All our work processes are configured to ensure that all our customers are serviced perfectly. We produce in line with our ISO 9001:2015 Quality Certificate and our products are certified by local and international institutions such as CE, TSE.

Our Differences

With 100% LOCAL PRODUCTION

we contribute to the economy. Our products are also acknowledged and used in global markets thanks to their high quality standards.

THANKS TO OUR FLEXIBILITY AND SPEED

we can meet urgent customer demands, even forecast their needs and expectations before them.

OUR PROFESSIONAL TECHNICAL TEAM

continues to give our customers after-sales support with technical trainings they need.

Our Differences

OUR OPTIMUM PRICING POLICY

enables us to maximize our customers' profitability. The cost advantage that the simplified processes provide us is reflected to our customers as a price advantage.

OUR R&D TEAM

pursues global innovations to locally develop products that will be used in the construction of comfortable buildings.

OUR OPTIMUM PRICING POLICY

includes hundreds of different products to be used from the foundation of a construction to the concrete, from isolation to the details of the architecture, to the renovation of historical buildings.

Our Differences

We produce high quality construction chemicals in **11 main product categories**.
We also produce gray and white EPS with our isolation brand IGLOO.

Waterproofing Systems

Floor Systems

Mold Release Agents and Curing Components

Tile Grouts

Sealants

Thermal Insulation Systems

Cement Based Plasters and Bonding Mortars

Technical Adhesives

Repair and Reinforcement

Concrete and Mortar Admixtures

Tile and Ceramic Adhesives

EPS

Waterproofing Systems

In this category, we produce MS Polymer, hybrid polymer, bitumen, polyurethane, acrylic and cement based products. Waterproofing tapes are also produced in this category.

FiXA®

Fixa is proud to be the first producer of MS Polymer waterproofing products, sealants and adhesives, a technology developed by Kaneka in Japan.

Achievement Award Of
Isolation Industry
2013
Product of the year
for water
impermeability

Achievement Award Of
Isolation Industry
2014
Product of the year
for water
impermeability

Sealants

Our sealants are produced under following subcategories:

- Ms Polymer Sealants
- Polyurethane Sealants
- Polyurethane + Tar Sealants
- Acrylic Sealants
- Silicone Sealants
- Polyurethane Foams

FiXA®

Repair and Reinforcement

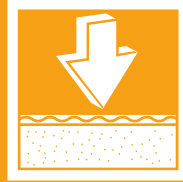

Cement, hydraulic lime and epoxy based repair, renovation and reinforcement products are produced in this category.

FiXA®

Floor Systems

In this category, we produce liquid surface hardeners which prevent dusting, as well as cement and gypsum based screeds, epoxy floor coatings, floor primers and floor coatings.

FiXA®

Thermal Insulations Systems

In this category, we produce heat insulation plates, primers for heat insulation systems, adhesives in various chemical phases and plasters.

FIXA®

Concrete and Mortar Admixtures

In this category, we produce admixtures which increase the resistance of the concrete and the mortar against frost, and make application easier by increasing the water impermeability and workability.

FIXA®

Mold Release Agents and Curing Components

Mold release agents that allow the mold to be separated easily from the concrete, and compounds that prevent quick loss of water of the concrete, are produced in this category.

FIXA®

Cement Based Plasters and Bonding Mortars

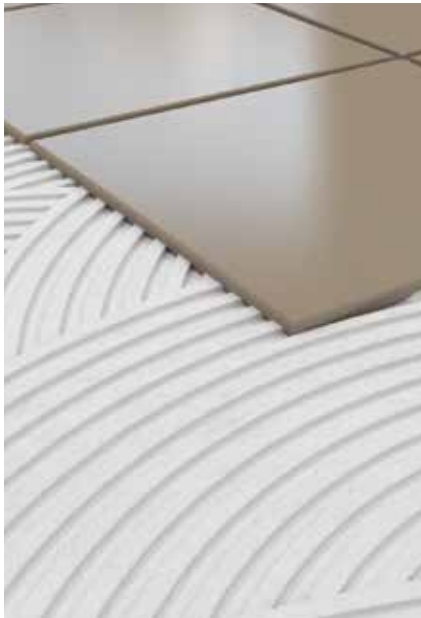

In this category, we produce
primers, plasters and cement
based bonding mortars.

FIXA®

Tile and Ceramic Adhesives

In this category, we produce primers and adhesives for floor and wall coverings such as ceramic, tiles, granite, natural stones.

FIXA®

Tile Grouts

In this category, we produce grouting materials in various colors and for different sizes, as well as cleaning products.

FiXA®

Technical Adhesives

Technical adhesives for different purposes with high adhesion properties are produced under this product category.

FIXA®

Our Business Model

The quality checks of all raw materials are completed before they are accepted.

All raw materials are supplied by distinguished suppliers.

Orders from customers are taken to the production line and packaged automatically within the production planning procedures.

Products are delivered wherever needed thanks to our large distribution network and vehicles.

Product Responsibility Certificate by Mapfre can be disclosed to our customers upon request.

Our technical managers support all users in construction sites with trainings and demonstrations.

Istanbul Facilities

Total Area : 7000m²
Close Area : 4200m²
Production Capacity : 180.000 tones/year (powder)
5.000 tones/year (liquid)
5.000 tones/year (silicone-sealants)

Istanbul Facilities

Istanbul Facilities

FIXA[®]

Istanbul Facilities

FIXA[®]

Adana Facilities

Our plant which is located in Hacı Sabancı Organized Industrial Zone services to Çukurova, East and SouthEast Anatolian regions.

Total Area : **3500m²**
Close Area : **2500m²**
Production Capacity : **90.000 tones/year (powder)**

Adana Facilities

Our Plant opened in 2009 is the first construction chemicals factory in the region. It has a considerable potential for import due to its proximity to Mersin Customs, and Iraq and Syria borders.

Ankara Facilities

Our factory which is located in Başkent Organized Industrial Zone is at 5 km distance to Ankara-Eskişehir highway and 1 km distance to Malıköy railway station. It serves to our customers in Central Anatolia, Black Sea, Aegean and Mediteranean regions. The factory is established in 2011 and has a fully automatic mixture and packaging line.

Ankara Facilities

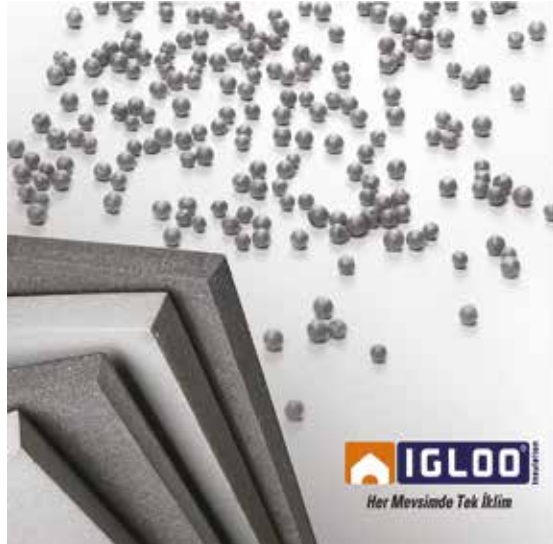

Total Area : 7200m²
Close Area : 4800m²
Production Capacity : 120.000 tones/year (powder)

IGLOO İstanbul Facilities

Our plant which is opened in 2011 in Bakır ve Pirinççiler Industrial Zone in BOSB serves to Marmara and Central Anatolian regions.

Total Area : **4500m³**
Close Area : **5000m³**
Production Capacity : **450.000m³ tones/year (EPS)**

IGLOO İstanbul Facilities

There are different production lines for white EPS and gray EPS. The plant has a 1500 m³ puffing, block production and cutting and packaging capacity.

Our intention is to be the best of ...

our class in Turkey and a reputable brand in the World, in the production of latest technology construction chemicals.

We wish to contribute to the development the construction industry with our experience and knowledge.
